- Mongo Db
- Html
- Css
- Java Script

CERTIFICATES

Full Stack Java Script bootcamp
in Go my code

PROFESSIONAL EXPERIENCE

I bring hands-on expertise as a Full Stack JavaScript developer, specializing in e-commerce website development. Leveraging React.js on the frontend, I crafted dynamic and responsive user interfaces, enhancing the overall shopping experience. On the backend, I utilized Node.js for efficient server-side operations, taking advantage of its asynchronous capabilities. MongoDB served as the database, ensuring seamless storage and retrieval of product information. Throughout the development lifecycle, my focus remained on optimizing performance and user interactions to elevate customer satisfaction. This experience has fortified my ability to build scalable, user-friendly web applications within collaborative team environments.
